Include your IPO Chart with your code in Eclipse IDE: We will discuss and demonstrate this in the computer lab.

IPO CHART

Program name:	AddCoins	
INPUT	PROCESS	OUTPUT
Hint: What will the user input?	Hint: What is the program going to do with the input information?	Hint: What will the screen display after user input?
Will input the amount of quarters, dimes, nickels, and pennies the user has.	<p>Will record the amount of each coin the user has in variables with corresponding coin as its name.</p> <p>Will then call addCoins method with each coin variable as an argument going from biggest to smallest(Quarter to penny)</p> <p>Method will then take the parameters and multiple each value by its dollar value(Ex: Quarter * 0.25, nickel * 0.05) and will return the sum of all the products of the coins multiplied by their dollar values.</p>	Will output value returned by method as the total dollar amount the user has.
