Include your IPO Chart with your code in Eclipse IDE: We will discuss and demonstrate this in the computer lab.

IPO CHART

Program name:	Election calculator	
INPUT	**PROCESS**	**OUTPUT**
Hint: What will the user input?	Hint: What is the program going to do with the input information?	Hint: What will the screen display after user input?
User will input votes each candidate got in each of the three states	Will declare needed variables.Each candidate will have three variables one for each state and their total votes and Percentage variables and a total of all votes variables. Will initialize each candidate state variable for each state with inputs user enters Then will add up each candidate's total votes and initialize it in their total votes variable. Will add every candidates totalVotes variable to get total of all votes and initialize it into total of all	Will output candidate names along with the total amount of votes they got and percentages. Then output the total of all votes.

	votes variable	
	Then will get values of each candidate's total vote percentage by dividing each candidate's total votes by the total of all votes.
