Include your IPO Chart with your code in Eclipse IDE: We will discuss and demonstrate this in the computer lab.

IPO CHART

Program name:	Quadratic equation root solver	
INPUT	**PROCESS**	**OUTPUT**
Hint: What will the user input?	Hint: What is the program going to do with the input information?	Hint: What will the screen display after user input?
Enter a, b, and c values of quadratic equation	Will store a, b and c values in variables declared for them(valA - C) and will also declare variables to store roots(root1 and 2) in Will use quadratic equation with given values to calculate both roots	Prompts user to input a, b, and c values. Outputs roots for equation which values the user gave
